

Orion Production and Operations
Request for Information (RFI)
Questions and Answers

NNJ16598628L
Modification 1

Q1: Can you share the reason why the USG has put out this RFI? Is it required prior to exercising the existing options?

A1: The United States Government (USG) has posted the Orion Production and Operations Request for Information (RFI) as part of the market research process to assist NASA in identifying the most advantageous method of fulfilling the Government's needs. This RFI serves as an examination of the market, which is an initial step in pursuing any of the available acquisition strategies, including the exercising of existing options.
